Katarina Radić

From Intern to Chief Supply Chain Officer's Assistant

When I applied for Swarovski's internship program, I saw it as a chance to gain practical experience and learn from experts in a truly international environment. What I did not expect was that it would become the beginning of my career journey with the company.

From day one, I felt welcomed and supported. Throughout the internship, I had the opportunity to apply what I learned at university while developing new skills and gaining insights into how a global organization operates. Every project and every interaction helped me grow professionally and personally.

One memorable moment was the EXCO visit to Subotica, where I met Ivanka Janssen for the first time. At the time, I had no idea that this meeting would later become such an important part of my journey. Today, I am proud to work alongside her as Assistant to the Chief Supply Chain Officer, supporting strategic initiatives across the organization.

What I appreciate most about Swarovski is the trust, support, and continuous learning opportunities. As someone at the beginning of my career, I could not imagine a better environment to learn, grow, and take on new challenges.

My advice to future interns: Be curious, ask questions, and take every opportunity to learn. You never know where your internship journey might take you.

Nikolina Milošević

From Intern to Data Analyst

My Swarovski journey started with an internship that gave me the opportunity to experience life inside a global company for the first time. During the internship, I worked on projects related to data analysis, machine learning, and process optimization. I gained hands-on experience with tools such as SAP, Tableau, and Python while working on real business challenges and learning how data can support decision-making.

What made the experience especially valuable was the opportunity to collaborate with colleagues from different countries and cultures. Working with international teams helped me develop not only technical skills but also a broader perspective on how global businesses operate.

Receiving a full-time offer at the end of the internship was a very proud moment for me. Today, as a Data Analyst, I continue to learn every day, work with large datasets, and contribute to projects that create real business value.

What I enjoy most about Swarovski is the culture of learning and collaboration. People are always willing to share their knowledge and support each other's growth.

My advice to future interns: Stay curious, be open to new experiences, and never be afraid to ask questions. An internship can be the first step toward an exciting career.

Igor Ilić

From Intern to Global Inventory Specialist

I was excited when I received the opportunity to join Swarovski as an intern. Looking back, it was one of the most important steps in my professional journey.

The internship allowed me to develop technical and analytical skills through hands-on experience with Excel, SAP, and Python. More importantly, it helped me understand how a global business operates and gave me valuable insights that no classroom could provide.

One of the highlights was sharing the experience with two fellow interns. We started together, learned together, and built friendships that continue to this day.

Throughout the internship, I received incredible support from mentors and colleagues who encouraged us to learn, grow, and take on new challenges. Their trust and guidance helped all three of us continue our careers within Swarovski after the program ended. Today, I work as a Global Inventory Specialist and continue to build on everything I learned during my internship. What I value most is the company's open culture and the people who are always willing to help, share knowledge, and support each other's success.

My advice to future interns: Make the most of every opportunity. The experience, connections, and skills you gain can open doors you never expected.
